BuyAnyLight Initial Exchange Offering (IEO)

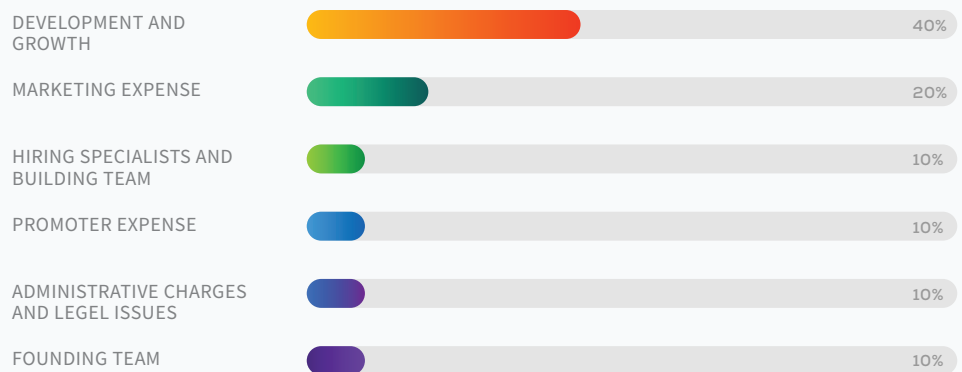

Project Introduction

BuyAnyLight (BAL) is a revolutionary global marketplace for quality LED lighting. Our innovative platform uses the sophisticated and powerful technology offered by blockchain, smart contracts, AI and Big Data to make the LED lights sourcing process seamless and super-fast! BAL also provides a dedicated LED expert on hand to help you choose the perfect LED lighting products to meet your needs whether personal, commercial or industrial.

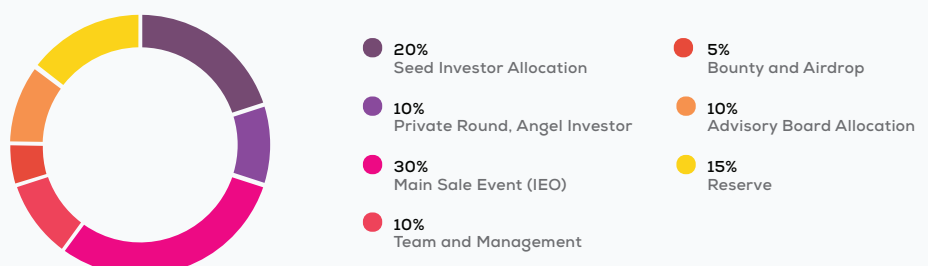

Our Vision

Our vision is to become the leading global platform of choice for buyers and sellers of LED lighting products. We aim to open up a new and freer access to LED sourcing and eliminate the role of costly intermediaries.

Fund Distribution Plan

Token Distribution

The Problem

- Technical expertise required for buying the right lighting products
- Trust deficit between seller and buyer
- Centralization of business model
- Handling logistics
- Massive marketing costs for manufacturer and retailers
- Hefty platform commissions
- Huge payment processing fee
- Middlemen adds to the cost

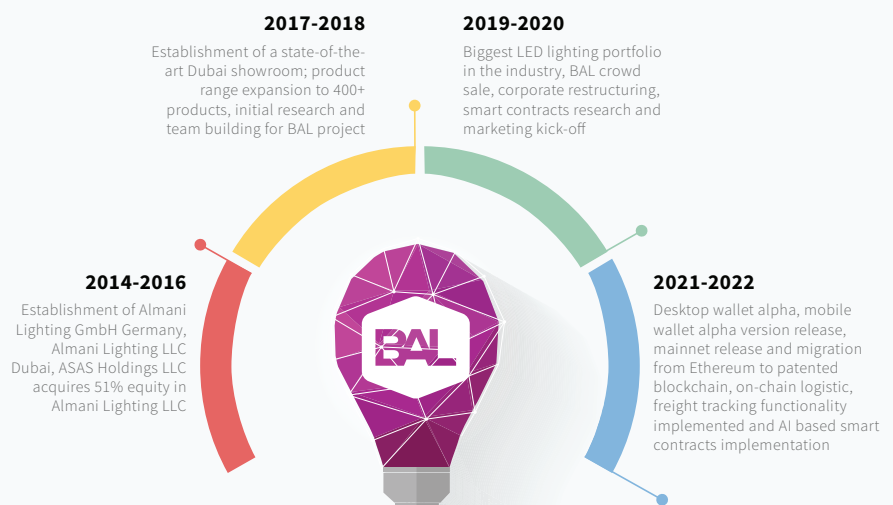

Our Solution

- Our experienced consultants help you to buy the right product
- Smart contracts enable trustless payment
- Decentralization through tokenization
- Transparency and traceability through blockchain
- We market while you focus on delivery
- Nominal platform costs
- Near-zero transactional costs
- Trustless transactions through smart contracts

Why Choose BAL?

1. Platform already operational
2. Unique, forward-thinking business model
3. Team expertise
4. Blockchain enables efficient, self-sustainable operations
5. Transparency through decentralization
6. Excellent product logistics and quality control
7. Agile marketing and go-to market strategy

Roadmap
