Introducing Buy Any Lights (BAL)

BuyAnyLight (BAL) is an innovative online platform providing LED lighting solutions for your projects in record time and at unbeatable prices. Just upload your project requirements via BAL's user-friendly interface, then sit back while our team of experts present you with the best possible solution and an excellent quote!

You pay BAL a one-time fee – but only when you decide to buy our solution or order a sample. Once you've placed your order with us, you can use the time and effort you've saved to attend to other important matters in your business. We **guarantee** that no local company can match BAL's all-round top value – we're Number One for price, quality, and service, too.

BAL vs. your lighting suppliers?

BAL has exclusive partnerships with factories that serve as contract manufacturers to the global brands you know so well... Phillips, Osram, Ledvance, BEGA, iGuzzini and many more. Our huge buying power also brings us huge discounts and we're pleased to pass on these discounts to you, whether you're buying a handful of lights or a vast quantity!

These strong partnerships explain the difference between BAL and other lighting companies: the lights you buy at BAL are identical in quality to the world's trusted brands - but at a fraction of the retail price! We simply offer the best rate anywhere for any brand of light you choose.

We charge no commitment fees, and you don't have to worry about shipping hassles. We take care of it all. We understand your work and the challenges you normally face when dealing with lighting companies, and we're here to make a real difference!

LIGHTING COMPANIES

MUCH HASSLES

With other lighting companies, you'll usually go through repetitive quote negotiations causing confusion and delays.

PAY MORE

High overheads and multiple middle-men mean that your partial payment to a local supplier is usually more than the total bill at BAL!

LIMITED OPTIONS

Lighting companies will offer you only what they have in their catalogue. BAL even beats the distributors when it comes to variety!

TIME-CONSUMING

Searching for suppliers, getting quotes and comparing results eats up time and demands lots of research and effort, with no assurance of a good deal

HIGH RISK

With other companies you risk being scammed or short-changed with your goods, payment, logistics and other procedures.

RIGID QUOTES

Other suppliers give you no freedom to add your own markup to the quote – yet your client will pay more, and you'll get nothing for your trouble but the occasional 'Thank you'.

INFERIOR LOGISTICS

With order tracking a rarity, keeping track of everything can be a nightmare, especially with partial deliveries.
